

WHITE PAPER

INTRODUCTION

As the traditional financial world becomes more digital, data collected over the last 10 years shows that investors are looking for ways to supplement their jobs with passive income while being able to manage their investments cost effectively. This means less reliance on a financial advisor or firm and more reliance on products and services that allow the customer to intelligently manage their digital assets across multiple platforms, from the comfort of their own home.

Currently, the market for launching financial products, and services like these, are still incredibly young, and ripe with frequent liquidity hacks, scams, and out-right lies. Due to the inherent nature of the 'build fast and break things' mentality (largely supported by Big Tech). The average investor may find this industry difficult to navigate without taking on significant risk.

Regulatory changes will be needed before much of the public is able to participate safely in these project launches and token sales. However, at the rate the global markets are moving towards an entirely digital economy, this financial trend is clearly gaining momentum, as firms leave the sidelines for more risk-on assets, and higher allocation of self-funded private sales.

MISSION STATEMENT

Enter **Overpowered**. The solution to self-custody, decentralized trading, and passive income generation.

Through development of our decentralized application (DApp), smart contract management tools, token swap platform, and launchpad ecosystem, our project aims to provide value for new investors by providing services, yet to be offered in house, by a single source.

By holding the **Overpowered** token (\$OP) and using the DApp's suite of management tools, investors can participate in stealth token launches, and trade (or swap) other digital assets all while strengthening and enriching the ecosystem through deflationary token incentives, and "staking" at a staggering rate of 400,977% APY.

Overpowered has locked liquidity for 6 months, while incentivizing both investors, and advertisers through a (DApp) portfolio management platform, advertisement portal, and launchpad. Our mission is to drive momentum to these platforms, while rewarding loyal \$OP holders who plan to use our suite of tools.

The platform that we build will provide any user with advanced portfolio management tools such as price analysis, risk assessment, customizable UI, tracking of wallets, transaction history, and more.

In addition, "higher-tier" DApp features and indicators, will be accessible when the connected wallet holds a minimum balance of the **Overpowered token**.

Permissionless and completely decentralized, it oversees the hard work of managing funds across any platform, and gives the trader, investor, or entrepreneur the peace of mind knowing they have all these tools and more at their fingertips.

OVERPOWERED Products: Launchpad and Suite of Tools

The **Overpowered** Launchpad (**OPAD**) will be the central hub of the overpowered network.

Allowing projects to launch safely, the team will be able to connect with investors, host pre-sales, and provide B2B opportunities that put 'ease of use', and security at the forefront of all that we build.

OPAD will include several advanced functions to help onboard, market, and expand the reach of any BSC project in the digital assets space. We will be building features allowing for locking liquidity, auditing, and providing KYC to their presale investors.

As an additional marketing package, projects will have the ability to use targeted ad banners, and trending spots on our decentralized **OPSwap** platform. Fees from these offered services, will act as a consistent form of revenue for our future launches and development.

While increasing trust between business and consumer, our launchpad will drive organic growth, and exposure to other realms of the digital asset market that takes years of network building.

OPAD does all the heavy lifting in terms of launching, organically marketing, and instilling investor trust in your project. It gives the trader, as well as entrepreneur the peace of mind knowing they have all these tools and more at their fingertips, as well as the back-end force to manage, and minimize the inherent risk in presales.

OUR OVERPOWERED TEAM & COMMUNITY

Overpowered is backed by a resolute team of professionals who have 20+ years of experience operating businesses, developing software, and bringing products to market. The members of the team have specialized in algorithmic trading tools, machine learning, SEO, financial products, & DeFi ecosystems.

As **Overpowered** core members, we are exceptionally proud of the community that surrounds our token. We work to provide engagement through our social media pages, as well as timely announcements, Twitter Spaces, AMA's and community buy contests. The result of which, is an honest and progress-driven token, backed by our biggest investors, as well as the true supporters of the vision for self-custody, asset management, and financial independence.

We encourage anyone who believes in our use case or tokenomics, to please volunteer in getting the word out about Overpowered and our incredible APY and auto-staking feature.

In the future we hope to integrate the power of the community in deciding if excess funds will be spent on marketing budgets, for yield farming integration, random NFT generation, token burns, lottery-driven incentives, and much, much more!

OVERPOWERED TOKENOMICS

The Overpowered Auto-Staking Protocol (OPAP) is an advanced feature, rewarding Overpowered token holders with an APY of 400,977%. Considerably one of the highest in the cryptocurrency space, this protocol allows anyone (simply holding the token in their wallet), to compound their yield at 2.35% a day.

OPAP protocol will grant the following benefits:

- **Overpowered Insurance Fund (OPIF)** - 5% of all trading fees are stored in the OPIF which helps sustain and back the staking rewards by maintaining price stability, thus greatly reducing downside risk.
- **Staking Made Simple** - The Overpowered token simply resides in your wallet, without the need for a third party or centralized authority. You will automatically receive rewards in your wallet.
- **Automatic Payment of Interest Yield** – As a separate function, interest yield is paid automatically and compounded in your wallet, guaranteeing you will never miss a payment.
- **Highest Fixed APY** - Overpowered pays out at 400,977% in the first twelve months, rivaling any Titano, or SAFUU forks currently available in BSC. After the first 12 months, the interest drops at a predefined long-term rate. The effects of this are mitigated by our strategic burn wallet, treasury funding, and re-base function.
- **Lightening Interest Payments** - The Overpowered Auto-staking Protocol (OPAP) pays Overpowered token holders every 15 minutes (or 96 times a day), making it one of the fastest auto-compounding protocols on BSC.
- **Thunderdome Development Wallet** – This automated token removal system helps to regulate the supply and to support the development of the Overpowered Ecosystem. It systematically collects 2.5% of each transaction as it is realized in real time. It will also enable future incentives for the community or facilitate revenue from our IP.
